

Acrylics are a proven part of this hobby; they are not experimental. You can use them with confidence--but don't overpaint. Let your competition decouple.

Of course, if you need more information, give me a call and I'll try to help. The FINISHING VIDEOS will be the best help. Any when you become a master finisher, you can pass the information on to others. Let's all have beautiful ships and share the joy of creating artwork.

Our thanks to the Screamin' Demon, newsletter of the Sky Demons, Shreveport, Louisiana

"The truth about aeroplanes is that, as man's most highly-engineered creation, they are inherently troublesome."
